Non-Responsive

AGENDA

- I. Site Update
- II. Stormwater
- III. Round 2 Report Update
 - a. "Roll-out" Meeting(s)
- IV. Upcoming Deliverables
- V. Status of EPA Comments
- VI. Other

Portland Harbor Future Issues

RI/FS

1. Upstream/Baseline/Ambient Background
2. Project Schedule – What are the problems in developing the schedule and the post-ROD schedule?
3. Ecological Risk Assessment – Is LWG on track and how much remains to be done?
4. Data gaps and the status of overall sampling
5. Sediment Management Areas (SMA) – How will this be created and how will it be managed?
6. FS vs. RD/RA
7. A public presentation to the Portland City Council will need to be arranged soon. It would be helpful for the group to be there as a team to present.

Inter-Program Issues

1. Source Control and LWG – The in-water schedule will need to be integrated prior to the ROD.
2. Corps of Engineers Process
3. CERCLA/NRDA Connection
4. Salmon, Sturgeon and Lamprey studies and their relationship to NRDA
5. WRDA – Reengage conversations about the role of WRDA.

ROD

1. Contents of the ROD
2. Site Boundaries

Post-ROD

1. Post LWG Institutional Structure
2. Orphan Share
3. Oregon Department of State Lands (DSL) and the in-water remedy action
4. PRP Search and Allocation

Miscellaneous

1. Potential additional early actions and current early actions
2. Tribal Funding
